

SAFETY INSTRUCTIONS FOR RENTAL OF INFLATABLE HOT TUBS

We want you to fall in love with our inflatable Hot Tubs and we want you to relax and enjoy them so much that you use us again, and recommend us to your friends.

Falling in love can be a dangerous business though, and there are some do's and don'ts we need to make you aware of to ensure that your time with our hot tub is relaxing and enjoyable:

So:

Please do not use the hot tub during pregnancy.

Anyone having an upset tummy in the last 7 days should not use the hot tub as this can spread infection.

If you suffer from heart disease, diabetes, low or high blood pressure, or any medical condition, please speak to your Doctor before use.

People with skin, ear, genital or other body infections, open sores, or wounds should not use the hot tub because of the possibility of spreading infection.

Hot tubs are not suitable for children under the age of five and older children must not be allowed to use the Hot Tub alone. Only children tall enough to stand with their feet on the floor and their head out of the water should be allowed to use the hot tub. Under 16's should ALWAYS be supervised.

There is a major risk of drowning. Parents should warn children not to allow water in their mouths as this may cause illness.

The heat of the water speeds up the effects of alcohol and can cause sleepiness, dizziness and unconsciousness.

Never use the hot tub while using or after using narcotics/other drugs/excessive alcohol that may cause sleepiness, drowsiness or raise/lower blood pressure.

Restrict your time in the Hot Tub to a maximum of 20mins.

Shower with soap and water before and after using the hot tub. Showering before use washes away many of the common skin bacteria and removes lotions, deodorants, creams etc which reduce the effectiveness of the spa sanitizer which disinfects the water.

Do not immerse your head in the hot tub water.

When not in use, make sure the cover is on in order to eliminate the risks for children and pets.

At ALL times make sure pets are a safe distance away from the hot tub.

Never use the hot tub alone.

Don't use the hot tub immediately after a meal.

Avoid entering the hot tub water immediately after exercising as the water temperature can affect the heart rate.

Don't use glass near or in the hot tub.

Don't use the Hot Tub if you have recently had a spray tan as not only will you lose your tan but you will also block the filter and lose your deposit.

Do not use any electrical appliances near/in the hot tub. This is a MAJOR risk.

If any allergic reaction occurs leave the hot tub and rinse off in the shower. If the reaction persists contact your Doctor.

Ensure no contaminants ie - bubble bath, alcohol, oils etc are placed in the water as this may upset the chemical balance of the water and can result in allergic reactions.

Please DO NOT smoke in OR near the hot tub – this could cause damage.

CHEMICALS:

We thoroughly clean and sanitize all of our hot tubs between uses. You are required to add chlorine doses daily, by adding (HALF A TEASPOON OF GRANULES DISSOLVED IN WARM WATER) to the tub. Please ensure you use gloves and handle the chlorine carefully. Do not allow it to come into contact with your skin, do not ingest and do not inhale. Please store in a cool dark place, away from children.

If you have an allergy to chlorine please seek medical advice before using the hot tub.

RESPONSIBILITY:

It is your responsibility to enforce these rules and to control your guests whilst in the hot tub.

I the undersigned have read this safety instruction and understand the risks. I understand what it says and promise to follow the rules of safety and to pass on to other users whilst the hot tub is in my possession. You use the Hot Tub at your own risk

We cannot be held responsible for your safety whilst you are using the Hot Tub.

If any fault or damage occurs with the hot tub please call us on 07701 062052 as quickly as possible.
